Uniquus Consultech launches its Valuations practice

Expands Global Advisory Suite with Launch of Valuations Practice

Mumbai, India – 10 March 2026: Uniquus Consultech, a tech-enabled global consulting platform, today announced the launch of its **Valuations practice**. This launch augments Uniquus' integrated suite of financial reporting, governance, risk and technology solutions, providing a technology-led approach to valuation in an increasingly volatile global environment.

The Valuation practice will offer a comprehensive range of services, including business and intangible asset valuation; financial reporting valuation; compliance and regulatory valuation; private equity and venture capital valuation support; property, plant and equipment valuation (including real estate); and dispute resolution. These capabilities are designed to support clients for all their valuation needs across the complete transaction lifecycle – from deals and investments to ongoing reporting, compliance, and long-term strategic decision making.

The practice will be led by a senior team of experienced valuation specialists with a strong track record of advising global enterprises, private equity firms, and high-growth companies across sectors and geographies.

Central to the new practice is Uniquus' AI-enabled proprietary technology stack, designed to facilitate quicker, more consistent and comprehensive delivery of valuation services.

*Commenting on the launch, **Jamil Khatri, Co-Founder & CEO, Uniquus Consultech**, said:, "Valuation today sits at the critical intersection of deals, financial reporting, tax, and regulatory oversight. Clients are looking for advisors who combine deep technical expertise with a practical understanding of business, deals, accounting, disclosure, regulations and stakeholder expectations. By adding a dedicated Valuations practice to our platform, we are providing our clients with a more integrated advisory experience. Consistent with the Uniquus philosophy, tech and AI enablement will be at the core of our approach to valuations."*

***Kapil Bellubi, Partner, Head of Valuations**, said, "Clients demand valuations that are technically robust, aligned with global financial reporting and regulatory standards, and delivered with speed and accuracy keeping in mind transaction and reporting deadlines. Our proposition brings together deep valuation expertise, strong accounting and transaction knowledge, and a tech-enabled globally integrated delivery model to meet that need."*
